

ABOUT LUCID NETWORKS

About us - Who we are and what we do

Company Overview

We're a growing, customer focused company, providing a range of IT services to small & medium sized businesses throughout the UK.

We provide business telephone services, systems maintenance, and hosted, managed servers and applications from our datacentre.

Founded in 2006, we have grown consistently year on year, with offices in Manchester and Edinburgh.

We simplify IT deployment, reduce capital expenditure, and directly tie costs to the number of users using the system. We reduce the requirement for IT support, and increase data security and accessibility. Our subscription based billing model makes costs rise and fall predictably as user numbers vary.

Lucid Networks Edinburgh Office

Our systems

"We use all our own services to run our business"

We use Open Source technology to deliver our services, and we use all our own services to run our business. We make sure that our services work well for our own people before offering them to our customers.

We work with only market leading manufacturers and service providers to make sure our customers receive the highest quality service.

Our Service

"Lucid's support has been fantastic" Jonathon Ellis, Occupancy Marketing, Edinburgh

We focus on providing excellent service, both before and after sale. Customer satisfaction is of the highest importance, and all our staff work hard to make sure every customer is 100% happy.

We work closely with all our customers to make sure we identify their needs, and provide practical, sensible solutions in return.
